

## Public Notice Regarding Change Out of Water Meters

The Department of Public Works is in the process of changing out all water meters to radio read meters. **We are currently working on the east side of town; east of the Canal and South of Route 88.** We have two crews of men working in that area. The men have Borough of Point Pleasant identification, and are driving small pickup trucks identified as Borough vehicles.

We are knocking on doors, and where the residents are home letting them know what we need to do and changing out the meters. When a resident is not home, if we have access to the crawl space where most meters are located, we are going ahead and changing out the meter and leaving a blue note to advise them of that. If we do not have access to the meter, we are leaving a note advising the resident to call our office to set up an appointment to change out the meter.

We apologize for any inconvenience this may cause. Once we make the change we will be able to read your meter as we drive down your street from our Water Department Vehicle.
